Dear Naomi,

We thank you and the Board Members of Child Aid Lanka for the great help that you have rendered by furnishing our Boy's Home with solar power lights. This has benefited the children very much. They can now continue their studies without any interruptions whatsoever because there is no power cut or anything of that sort. They can easily improve and progress in their studies, and also this system of lighting is economical and environment friendly as there is no waste to pollute the environment. We thank you for this worthy help.

The solar power system has been fixed properly and is functioning well. As the work is well done and to the satisfaction of those that are making use of it, you can send the money that is due to the company.

As we have made our request earlier, we hope that you would take much interest in furnishing solar power for the Computer Center, water pump, and Weaving and Skills Centres in this compound. This work provides educational and skills training opportunities to more than 100 children, who would otherwise not have this chance to search for a livelihood.

As you are taking great interest and enthusiasm in helping the children in every way for their progress we pray that God may bless you.

Thank You

Yours Truly

Rev.R.Dayanithy
